## EXPERIENCE

### Surlabs | Web Developer

March 2025 -Present

- Developed a **custom plugin** from scratch for **Ilias**, an open-source e-learning platform, extending its functionality and enhancing user interaction. Ensured seamless integration within the platform's architecture.
- Implemented the solution using **PHP** and the **repository pattern**, maintaining a modular structure. Used Git for version control and tools like PhpStorm to streamline development.
- Tested in a **real Ilias environment**, optimizing performance and ensuring stability. Focused on **scalability** and a smooth user experience through continuous refinement.

## PROJECTS

### Web Portfolio | Personal Project

January 2025 - March 2025

- Objective: Showcase personal skills and recent projects in a user-friendly website.
- Tech Stack: **React**, designed with an emphasis on easy navigation and clear presentation of experience.
- Outcome: Provides a concise and accessible overview of professional work and expertise.

### ColorEase: Accessible Colors | Collaborative Project

September 2024 - January 2025

- Objective: A tool to create accessible color combinations, Ensuring compliance with **WCAG standards**.
- Tech Stack: Built with React, focusing on usability and accessibility improvements for users with visual impairments (**improves contrast** ratio by 40%).
- Key Features: Enhances user experience with fast loading times and scalability for future updates.
