## SUMMARY

Driven software developer committed to delivering high-quality, maintainable, and scalable solutions. Enthusiastic about exploring new technologies, optimizing workflows, and improving system performance. Motivated to collaborate with diverse teams to solve complex problems and deliver tangible value to users.

## EXPERIENCE

### Full Stack Developer

**Surlabs** **January 2025 - Present**

- Developed **Checkeapp**, a real-time fact-checking platform using **Retrieval-Augmented Generation (RAG)** to retrieve live web sources and generate verifiable, reference-backed reports. **Achieving 95% accuracy** in generating verifiable reports from live web sources.
- Built scalable, production-ready web applications with **Next.js, React, and TypeScript**, focusing on clean architecture and performance.
- Created development pipelines using GitHub Actions, Vitest, and Jest to ensure reliable deployments to production environments.
- Implemented **type-safe service communication** using **oRPC**, ensuring reliable frontend–backend integration.
- Active **open-source contributor** to **STACKForILIAS**, developing and maintaining PHP features that enhance advanced mathematical assessments in the **ILIAS LMS**.
- Improve accessibility following WCAG standards along several LMS platforms such as Moodle and ILIAS.

## PROJECT

### OpoFlash

app.opo-flash.com • July 2025 - Present

- Developing a **full-stack EdTech platform** oriented to exams preparation, focused on improving long-term knowledge retention and study efficiency.
- Designed and implemented **adaptive quizzes** combined with a **Python-based Spaced Repetition System (FSRS-5)** to personalize learning paths.
- Architected a **scalable, data-driven microservices ecosystem** using **React, Next.js, and Docker**, enabling modular growth and maintainability.

### Web Portfolio

abrahammordev-portfolio.vercel.app/

- Objective: Showcase personal skills and recent projects in a user-friendly website.
- Tech Stack: React, designed with an emphasis on easy navigation and clear presentation of experience.

### QaRdrobe

app.qardrobe.com/ • October 2024 - February 2025

- Developed **QaRdrobe**, a full-stack **Digital Product Passport (DPP) platform** for the fashion industry, enabling brands to register garments, generate QR codes, and provide transparent product lifecycle traceability..
- Built a **scalable, modular architecture** with **React, Next.js, Node.js, TypeScript, Supabase, and Solidity**, integrating frontend, backend, and smart contract modules for maintainability and performance.

### ColorEase: Accessible Colors

- Objective: A tool to create accessible color combinations, Ensuring compliance with WCAG standards.
- Tech Stack: Built with React, focusing on usability and accessibility improvements for users with visual impairments (improves **contrast ratio by 40%**).

## EDUCATION

### Associate Degree in Computer Science

Hermanos Machado

## SKILLS

**Frontend:** React, Next.js, Vite, TypeScript, Chakra UI, Tailwind CSS, Shadcn/ui, Framer Motion, Responsive Design, Accessibility
**Backend:** Node.js, Express, PHP, Python, Java , Python , Django
**Database:** Supabase (PostgreSQL, Auth), MySQL, PostgreSQL
**DevOps / Testing:** Docker, Docker Compose, CI/CD (GitHub Actions), Jest, Vitest
